Q & A

**DIMITRIS KOLLIAS**  
 Commercial Development, Greenesco SA  
 Member of Groups P.P.C.R. and Attica Finance

Dimitris Kollias is working for more than 15 years in promoting projects of production of clean energy. The last five years he is in the field of energy efficiency and energy saving through the use of edge technologies as a commercial manager of GREENESCO, a major energy saving company. He is also an advisor for major companies to implement acts for promoting Company Social Responsibility through energy saving initiatives. He has experience in organizing sales departments for promoting goods and services. Since 2005 he is a trainer in developing personal skills in effective communication, team building, leadership and environmental awareness and has participated as an instructor and facilitator in many experiential learning workshops in Greece and abroad. Member of Rotary International since 1991 with significant activity in educating key people of Non Governmental Organizations and developing vocational and personal skills to them. Graduated from Athens University in 1995 with postgraduate studies in Philosophy and Psychology in 1999. He is trained further to implement Models of Qualitative Education and Environmental Awareness to adults for developing skills. He strongly believes that everyone is able, through organic education, to discover a better self, and skills than, so far, couldn't even imagine that he/she had. All this with great respect to human, to nature and to ethical values in every aspect. This is the way to build a better society, when we put all our efforts to become worthy of the future we dream of. Energy Saving is a large energy source and a major growth factor that declares our respect for the environmental awareness.
